**1-800-MELT-ICE**

# ARCTIC HEAT ROOFTABS™

use the power of HEAT to keep you and other safe from falling ice. It quickly melts the ice preventing ice dams and clearing drains, avoiding costly damage and repairs.

## Effective to -31°C (-25°F)

Arctic HEAT RoofTabs™ are powerful enough to effectively melt ice in some of the harshest winter conditions down to temperatures as low as -31°C (-25°F).

## Generates Heat on Contact

Arctic HEAT RoofTabs™ are made from concentrated Calcium Chloride Dihydrate and generate heat immediately upon contact with the ice. Arctic HEAT is more robust and effective than many other ice melters on the market today.

## Keeps you Safe

Arctic HEAT RoofTabs™ are great for melting and eliminating ice dams on your roof. If left unattended, these ice dam and icicles can easily fall from your roof injuring you or others. Stay safe with Arctic HEAT.

## Prevents Damages and Repairs

Arctic HEAT RoofTabs™ saves time and money from dealing with the damage and/or repair needed, caused by formation of ice dams, icicles, or ice & snow buildup on your roof and gutters.

## Perfect for those hard to reach areas

Arctic HEAT RoofTabs™ are designed for ease of use by simply placing, or safely tossing, them on to hard to reach places such as your roof, gutters, drains, or balconies where there is an accumulation of ice and snow.
